SUMMARY

Software Engineer building full-stack web applications, Windows desktop experiences, mobile apps, and AI-powered tools. Develops LLM agents, MCP integrations, and RAG pipelines using Claude, OpenAI, and LangGraph. Hands-on work spans developer workspaces, e-commerce, booking platforms, and bilingual document AI, using React, Next.js, FastAPI, PostgreSQL, Flutter, and .NET Core. Focused on maintainable code, clear interfaces, and practical evaluation.

EXPERIENCE

AI Agentic Engineer - Freelance
Aug 2025 - Present

Design and build AI agents, multi-agent workflows, and custom MCP integrations with REST APIs, databases, and files. Develop RAG pipelines with evaluation, guardrails, tracing, and cost controls. Use Codex, Claude Code, and Cursor with code review and testing.

Software Developer - eMicrolearn (Subsidiary of Pitman)
Mar 2022 - Nov 2025

Developed, enhanced, and maintained iBook digital learning platform features and integrated educational content. Implemented new functionality, debugged technical issues, and collaborated with technical and content teams to improve performance, user experience, and reliability. Contributed to database interaction, system testing, and quality assurance.

Recommendation letter

React Developer - HexaSol
Nov 2022 - Apr 2023

Developed React applications, led frontend work for the Hakini React Native project, and delivered the AZEZA mobile MVP. Contributed to code reviews and team knowledge sharing.

Full-Stack Developer Trainee - IConnect Tech
Aug 2022 - Oct 2022

Completed full-stack training in Angular and .NET Core, with practical projects covering API development, database design, and frontend-backend integration.

EDUCATION

University	Bachelor of Computer System Engineering - Arab American University, Jenin, Palestine
High School	Tawjihi (Scientific) - Qabatiya Secondary School, Jenin, Palestine

SKILLS

- **Frontend:** React, Next.js, Tailwind CSS, Angular, HTML5, CSS3.
- **Backend:** FastAPI, PostgreSQL, SQLAlchemy, Alembic, Supabase, .NET Core, Firebase, MongoDB, SQL Server.
- **Mobile Development:** Flutter, React Native, Expo.
- **Programming Languages:** C++, C#, Dart, JavaScript, TypeScript, Python.
- **Tools & Concepts:** Git & GitHub, Docker, Electron, Vite, Vercel & Render, OOP, Data Structures, REST APIs, Agile Methodologies.
- **Soft Skills:** Problem Solving, Collaboration, Communication.
- **AI & Agentic Engineering:** LLM Agents, Multi-Agent Orchestration, Tool/Function Calling, MCP Servers, RAG, Embeddings & Semantic Search, Prompt & Context Engineering, Structured Outputs, Agent Memory, Agent Evaluation & Guardrails.
- **AI Frameworks & Tools:** Claude API, OpenAI API, Claude Agent SDK, OpenAI Agents SDK, LangChain, LangGraph, LlamaIndex, Vercel AI SDK, n8n, Claude Code, Codex, Cursor, GitHub Copilot.
- **Vector DBs & LLMOps:** pgvector, Pinecone, Qdrant, ChromaDB, LangSmith, Langfuse.
- **AI Cloud Services:** Azure OpenAI, Azure AI Foundry, AWS Bedrock, Google Vertex AI, Gemini API, Hugging Face.

PROJECTS

DevHub - Developer Workspace

Developer command center for web and Windows (Electron): projects, Kanban, Markdown notes, clients, private team messaging, and community questions and replies. Read-only GitHub/Vercel/Render integrations, website monitoring, and a Python worker. Next.js, FastAPI, PostgreSQL.

Live website | Windows download

Lumma - Customizable E-commerce Platform

Customizable bilingual storefront and owner dashboard with product variants, inventory, discounts, and cash-on-delivery checkout. Next.js, TypeScript, PostgreSQL, Zustand, Zod, and Sharp; Android/iOS hosted-store wrappers.

Live website

Blossom Dreams - Salon & Booking Platform

Live salon website with treatment browsing, appointment booking, an admin workspace, and Resend email confirmations. FastAPI and PostgreSQL; account-free booking recovery with email verification.

Live website

King of Shisha - Online Store

Arabic RTL online store with product browsing, cart, order submission, and an admin dashboard. React frontend with a Supabase backend and responsive product images.

Live website

Warraq - Bilingual Document AI Assistant

Arabic/English document assistant for PDF, Word, TXT, and PowerPoint. Combines BM25 and Gemini semantic retrieval, query rewriting, and reranking to produce answers with document source references.

Live website | Source code

Apartment Reservation Mobile App

Graduation project rebuilt with Flutter, Riverpod, GoRouter, and Firebase. Student/owner workflows cover housing search, reservations, approvals, participant chat, notifications, and reviews.

Live website | Source code

math-tutor-website

Browser-only feedback design studio with 23 templates, local portraits, Arabic/English layouts, and multi-page 1080 x 1920 PNG Story exports. React, TypeScript, and Canvas API.

Live website | Source code

Employees & Companies API

ASP.NET Core 6 REST API for employees, companies, and employee transfers. C#, Entity Framework Core, SQL Server, code-first migrations, and Swagger.

Source code

Additional work: Personal Portfolio | Hakini - Arabic Login UI | ReactJS Admin Dashboard POC

LANGUAGES

Arabic: Native | English: Professional working
