SUMMARY

Software Engineer focused on AI agentic engineering, with a strong background in frontend and full-stack development. Builds LLM-powered agents and multi-agent workflows that plan, call tools, and automate real work, using Claude, OpenAI, MCP, and LangChain/LangGraph. Proficient in building scalable, maintainable, and performant applications using modern technologies such as React, React Native, Angular, and .NET Core. Strong problem solver with a passion for writing clean, efficient code and delivering elegant solutions that enhance user experience. Comfortable taking AI features from prototype to production with evaluation, guardrails, and clean integration into existing products.

EXPERIENCE

AI Agentic Engineer — Freelance, Remote **Aug 2025 – Present**

Design and build AI agents and multi-agent workflows using Claude and OpenAI APIs, LangGraph, and the Model Context Protocol (MCP). Develop custom MCP servers and tool integrations that let agents read and act on business systems (REST APIs, databases, files). Build RAG pipelines with vector databases, write evaluation suites to measure agent accuracy, and add guardrails, tracing, and cost controls. Use AI coding agents (Claude Code, Cursor) daily to speed up delivery while keeping code reviewed, tested, and maintainable.

Front-End Developer — eMicrolearn (Subsidiary of Pitman), Remote **Dec 2022 – July 2025**

Handling front-end development of the innovative iBook digital learning platform, delivering responsive and user-friendly interfaces. Collaborate with cross-functional teams to build high-quality features, optimize performance, and improve user engagement globally. Maintain clean, scalable React code following best practices.

React Developer — HexaSol, Jenin **Nov 2022 – Apr 2023**

Developed and maintained ReactJS web apps with a focus on performance and responsiveness. Led front-end development for the "Hakini" React Native project and built an MVP mobile app for AZEZA, ensuring timely delivery and high quality. Contributed actively to code reviews and team knowledge sharing.

Full-Stack Developer Trainee — IConnect Tech, Ramallah **Aug 2022 – Oct 2022**

Completed intensive training in Angular and .NET Core, building multiple projects to solidify full-stack development skills. Gained practical experience in API development, database design, and frontend-backend integration under expert mentorship.

EDUCATION

University Bachelor of Computer System Engineer (Arab American University) (Palestine – Jenin).
High School High School Certificate – Tawjihi (Scientific) (Palestine – Jenin – Qabatiya).

SKILLS

- **AI & Agentic Engineering:** LLM Agents, Multi-Agent Orchestration, Tool/Function Calling, MCP Servers, RAG, Embeddings & Semantic Search, Prompt & Context Engineering, Structured Outputs, Agent Memory, Agent Evaluation & Guardrails.
- **AI Cloud Services:** Azure OpenAI, Azure AI Foundry, AWS Bedrock, Google Vertex AI, Gemini API, Hugging Face.
- **Programming Languages:** C++, C#, Dart, JavaScript, TypeScript, Python.
- **Frontend:** React JS, React Native, Angular, HTML5, CSS3.
- **Backend:** .NET Core, Firebase, MongoDB, SQL Server.
- **AI Frameworks & Tools:** Claude API, OpenAI API, Claude Agent SDK, OpenAI Agents SDK, LangChain, LangGraph, LlamaIndex, Vercel AI SDK, n8n, Claude Code, Cursor, GitHub Copilot.
- **Vector DBs & LLMOps:** pgvector, Pinecone, Qdrant, ChromaDB, LangSmith, Langfuse, Docker.
- **Mobile Development:** Flutter, React Native.
- **Tools & Concepts:** OOP, Data Structures, REST APIs, Agile Methodologies.
- **Soft Skills:** Problem Solving, Collaboration, Communication.

PROJECTS

- **Apartment Reservation Mobile App** – Developed with Flutter, featuring real-time booking and user-friendly UI.
- **Login/Signup Modules** – Implemented secure authentication systems using React Native.
- **Online Store** – Full-stack web application built with ASP.NET Core 6, including product management and payment integration.
- **Guessing Game App** – React Native app focusing on interactive gameplay and smooth animations.
- **Proof of Concept (POC)** – Created ReactJS POC to validate new design approaches and improve user engagement.

LANGUAGES

Arabic: Native. **English:** Professional working.
